

Safe Software

Makers of the FME® Platform

Who We Are

Safe Software is one of British Columbia's largest software companies and is a proud member of Canada's Health and Technology Innovation Cluster. Our mission is to help organizations maximize the value of their data. The company has 180+ employees and is headquartered in Surrey, where it was co-founded by Don Murray and Dale Lutz in 1993.

FME Platform

Safe Software's data integration platform, FME (Feature Manipulation Engine) is trusted by over 10,000 organizations in 128 countries. Offering unrivaled support for spatial data, FME enables organizations to integrate data between systems so it can be used where, when, and how it's needed. Safe Software's global partner network of 150 companies supports users across a wide range of industries including government, utilities, energy, engineering, and systems integrators.
