ABOUT

Safe Software is one of British Columbia's largest software companies with more than 20,000 customers in over 100 countries. Its FME software is used by utilities, governments, engineering firms, and other organizations around the world to integrate enterprise systems and automate data processing. The company has 140 employees and is headquartered in Surrey, where it was founded in 1993.

FME TECHNOLOGY

With support for 350+ formats and applications, FME® is the data integration platform that converts, transforms, and automates data whenever and however it's needed. Built by Safe Software, FME technology empowers organizations to overcome their data challenges.

FME Desktop: Enables users to quickly set up and visualize data integration workflows without coding.

FME Server: Enables users to schedule enterprise-level data workflows, create notification services, and process data in real-time.

FME Cloud: Provides scalable and pay-as-you-go access to FME Server capabilities in the cloud.
